

HPDC Supplemental Guidance on Chemical Groups

This guidance supplements Clean Production Action's GreenScreen® for Safer Chemicals Chemical Groups Policy (version 1.0, April 2018), which is part of the Harmonized Method for Hazard Screening. This supplemental guidance is needed to address chemical groups in HPD Priority Hazard Lists that are not covered by this GreenScreen policy.

The list of compounds and members of the compound groups will be updated as needed. Timing of the updates will coincide with updating of the GreenScreen Chemical Groups Policy.

This list is developed and maintained by Healthy Building Network, in coordination with Clean Product Action.
