

Symposium Event Sponsorship - Target Key Players & Promote Your Organization.

HPDC's Material Health Open Innovation Symposium provides an excellent opportunity to gain recognition with manufacturers, architects, designers, builders, and other key players in the Material Health space. This is the one event each year solely dedicated to Material Health practice in the building industry!

Get noticed by key players and promote your organization's good work in the field of Material Health as a sponsor on Tuesday, November 15, 2022.

Check out the different benefits below — from having your logo placed on Innovation winner slides to pre-and-post Symposium announcements, and even having your own display presence at the symposium through virtual exhibit spaces.

To learn more or become an event sponsor for the Symposium, please contact Paula Schaper at pschaper@hpd-collaborative.org.
